Manual Interview Questions

1. What is manual testing?

2. Black box testing and white box testing

3. What is data base testing?

4. Software testing types.

5. Test cases.

6. Defect life cycle.

7. Tell me about your project.

8. What is the difference between manual and automation testing?

9. Why you choose manual testing?

10. Smoke and sanity Testing.

11. What is black box testing?

12. What is Regression Testing?

13. Why we choose testing?

14. SDLC Process

15. Positive testing and negative testing?

16. What is latent defect?

17. What is test case design techniques?

18. Data Testing.

19. What is a Bug?

20. What is compatibility testing?

21. Severity, priority, with examples

22. What is SDLC Principles?

23. Test design techniques.

24. Which is better among manual and automation Testing?

25. How to identify the bugs?

26. Explain about critical issue faced in your defects.

27. Explain about ERPPMC project.

28. Which of the following is not a non-functional testing?

a. Interoperability (compatibility) testing, reliability testing, performance testing
b. System testing, performance testing
c. Load testing, stress testing, component testing, portability testing
d. Testing various configurations, beta testing, load testing

29. What is vulnerability testing?

30. What is Alpha Testing?

31. List Annotations in TestNG.

32. What is compatibility testing?

33. Write test cases for email id?

34. How you start testing process?

35. What is test coverage?

36. What is Exhaustive testing?

37. What is Test Design?

38. If there are 100 cases, then how these cases are executed?

39. Testing techniques

40. Tell me about ERPPMC 5 scenarios?

41. _____ is to check the courage of requirements in the test design

42. What is test cases, how to write test cases for face mask.

43. What is bug life cycle?

44. Verification &Validation?

45. Write test cases on login page?

46. What is performance testing, types?

47. What are defect components?

48. What is an UI path in testing?

49. WhatsApp test scenarios.

50. Drop-down box?

51. Difference between Test design and Plan

52. Write Test case template?

53. What is testing methodology?

54. Test case for login Page XML and Types of XML

55. What is test cases how to design Testcases and Scenarios?

56. Difference between defect and error

57. What is BVA and EVP, how to use it?

58. What is functional testing and non-functional testing?

59. What are different types of SDLC models? Explain waterfall model.
